

## **PRE-TREATMENT CARE - LASER HAIR REMOVAL**

Avoid plucking, threading, waxing and electrolysis 4-6 weeks prior to treatment.

Please shave the treatment area 24 hours prior to day of treatment. If not shaved, this will be performed for you at an additional cost.

Do not tan in the sun or on tanning beds 3-4 weeks prior to treatment. If you are tanned, this may result in developing burns or hyperpigmentation on affected area which may take anywhere from 6 months to 2 years to resolve.
